# Impacts of In-Flight UNC Modifications

No.	Title	Status	Impact on Gas Year 2024/25 Statement and Table
0862	Amendments to the current Unidentified Gas Reconciliation Period arrangements	In Workgroup	Would remove the current 12-month UIG reconciliation “pot” and instead would share UIG back over the effective periods of all the underlying meter point reconciliations – no change required to any AUG Table as the new process would still use the relevant historic UIG Weighting Factors for the reconciliation months
0868	Change to the current Allocation of Unidentified Gas Statement frequency	In Workgroup	None for 2024/25. A future AUGS Table may need to apply for two or more years as part of the transition to a [3-year] AUG cycle
0873 New	Add specific roll-over functionality for the AUG Table 2025/26 <i>(raised 05/04/2024)</i>	Awaiting discussion at April Mod Panel	None for 2024/25. Proposes rolling over the 2025/26 AUGS Table to apply for two extra years as part of the transition to a [3-year] AUG cycle under Mod 0868
