Gemini Sustain Plus Update

UNC Panel / UNCC

January 2024

Progress Update

Gemini Sustain Plus is an upgrade of the whole Gemini system (platform and UI) combined with additional functionality and features.

Current Progress

Sustain Plus remains on track to be implemented in Sept 24. The Programme has converted the legacy code into modern code and is now performing development and testing of the new screen designs and features. This work will continue across all the Capacity and Balancing processes until the end of May 24. In addition, the new Microsoft technology platform is being built/tested in phases, including the database, job scheduler and security modules.

Regular more detailed updates and progress reports are provided via our Sustain Plus Focus Groups, which are current held every other month and open for anyone to attend that may have an interest in the programme and impacts.

Next Steps

- Detailed Design Change pack out for representation – until 29th January
- Continue development and testing of the Gemini process of new screens and batch jobs.
- Engaging with industry to prepare it for the changes ahead and the Market Trials period.
- Training content being developed for release in Q2 2024.

Focus Group

January 24 Focus Group

- The next Focus Group will be held on Monday 22nd January and the agenda will cover:

  - Programme progress updates
  - Change Pack highlights
  - The security framework
  - Training – E-module demonstration
  - Market Trials information
  - Q&A
