

UNC 0701:

Aligning Capacity booking under the UNC and arrangements set out in relevant NExAs

Proposer: Tracey Saunders (Northern Gas Networks)

Panel Date: 15th August 2019

Why change?

- Current lack of visibility where a NExA exists
- No current process to link the maximum Capacity quoted in the NExA with the maximum allowed capacity in the system
- No current process to link any forward NExA dates to the maximum capacity allowed

Options

- a) To keep visibility of NexA on an 'as requested' basis (as is)
- b) To make the NExA existence visible
- c) To link the Nexa & offtake charging dates (as per original)
- d) To do b) & c), and also linking the NExA value to the maximum system offtake value

Solution

- To introduce visibility where a NExA exists (for all classes) by creating a 'flag' in DES
- To link value in NExA to cap Maximum Offtake to that PMSOQ is capped at this value
- To introduce an effective from date where a NExA has a future dated increased Maximum Offtake

Recommended Steps

The Proposer recommends that this modification should be:

- Treated as Authority Direction
- Sent to Distribution Workgroup for assessment to develop the modification for 4 months
