

0881 - Scene Setting

- TDIIC is a document housing Transitional Rules, the majority of which are now long expired
- The expired rules create both a governance issue for passive readers and for introducing new legal text, as well as creating document stability issues for the code administrator
- The Transporters have worked collectively and collaboratively over a period of months to review TDIIC and mark any rules that are now expired for removal
 - Distribution rules were reviewed by the DNs and Transmission rules were reviewed by NGT
- The DNs have reviewed each-other's work and NGT has had internal scrutiny reviews
- Due to the age and specificity of some of the rules, specialist knowledge in some areas was required as part of the reviews
- We are now presenting the rules proposed for removal to Workgroup to ensure there is the ability for adequate scrutiny and checks and balances to take place
- We are also keen to put in place processes and practises to prevent future re-occurrence where temporary/transitional rules continue to exist due to lack of review
