

UNC 0XXX:

Mod Title: Update to Offtake Arrangements
Document Points of Telemetry

Proposer: David Mitchell

Panel Date: TBA

Why change?

- The table in OAD Section E Annex E1 needs to be updated as it was originally drafted at Network sales.
- Gas Distribution Networks own monitor and operate the Offtakes therefore they are responsible for ensuring that the equipment is fully operational.
- It has been identified that the sharing of some data items is no longer required and continuing to do so poses an unnecessary potential cyber security risk.
- This change will result in a reduction in handoffs between parties when siteworks are undertaken therefore reducing cyber risks and operational time and resources.

Solution

Please use bullets to briefly outline the solution contained within the modification.

- It is proposed to amend Annex E-1 Points of Telemetry contained with OAD Section E so that it reflects the current operational requirements.
- Telemetry on sites will be amended either by mutual agreement between parties or when future work is undertaken at the sites that may impact the telemetry points.

Recommended Steps

- The Proposer recommends that this modification should be:
 - Subject to Self-Governance
 - The modification should have a Workgroup assessment to develop the modification for 3 months.

Document Control to be removed upon completion of the template.
