

EU Update - CAM NC

Transmission Workgroup
4th - 5th July 2024

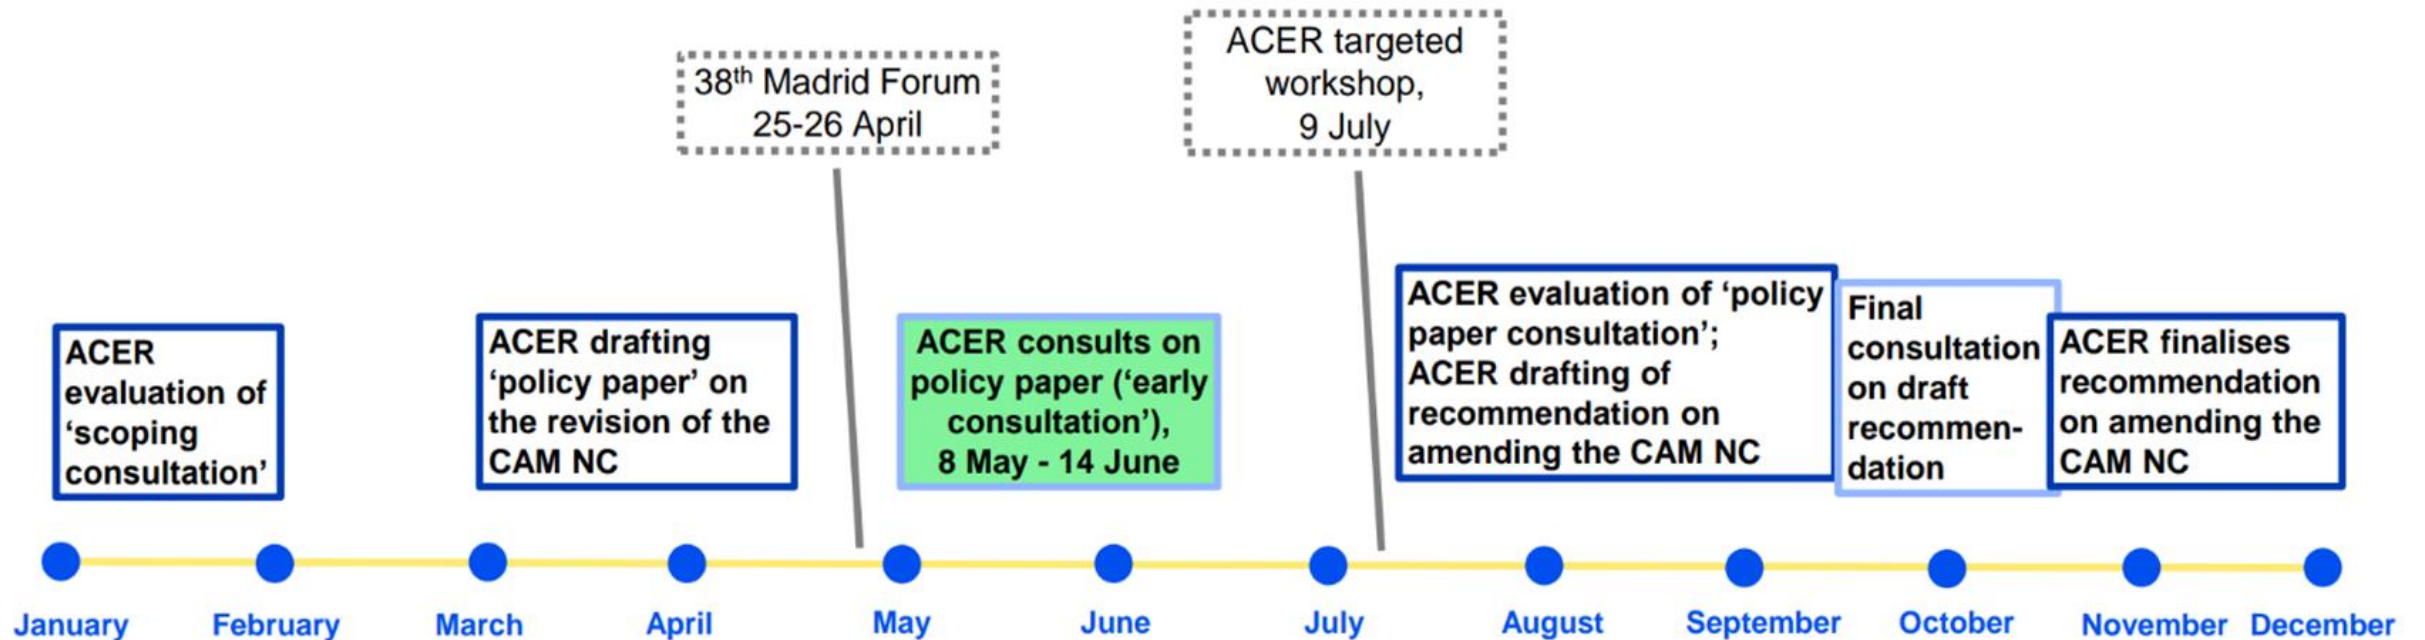

Consultation on proposed changes to CAM NC

- ACER's consultation on the proposed changes to CAM NC has now closed
- It is expected all consultation responses not marked confidential will be made available on ACER's website in the near future
- NGT has submitted a response that recognised the lack of detail and evidence of value contained within the consultation
- As a third country, we are not bound to accept any changes, but we are keen to ensure that UK views are represented to attempt to minimise any potential impact on the market
- NGT will continue to engage with neighbouring TSOs
- We will also continue to provide updates to Workgroup as required or as the proposals progress

CAM Process Timeline

- Implementation date is still TBD but unlikely before late 2025

Thank you
