

Demand Estimation Sub-Committee (DESC) Key Messages – 24 July 2024

Agenda Item Outcomes

Agenda Item 2.0: Review Industry Representations on 2024/25 NDM Algorithms

Following DESC's invitation to the wider industry to comment on the draft Gas Demand Profiles for Gas Year 2024/25 as part of the formal industry consultation, we can confirm there were no additional industry representations received.

DESC voted to approve the latest draft profiles which means the industry consultation has been completed for this year. Joint Office will issue a notification confirming this to the industry and Ofgem will also be informed.

The remaining activities will focus on updating the core industry systems (UK Link and Gemini) during August and September.

Agenda Item 5.0: Agreement of Ad hoc Workplan

DESC reviewed and approved the CDSP's recommended plan of ad hoc analysis for the upcoming Autumn/Winter period
