Aims / Objectives

- Provide progress update and key project milestones

- Revisit the original drivers & requirements

- Confirm & understand new service features / arrangements

- Inform stakeholders of implementation approach

- Detail future service enhancements

Naming

- The current system / service known as Internet Access to Data (IAD) is to be replaced

- IAD has previously been referred to as;
  - Xoserve
  - M Number Enquiry
  - SCOGES

- We launched a competition to suggest new names for the system and received lots of suggestions
  - Unfortunately we could not use any of these
  - We have decided not to refer to a system and promote our new service
  - This is consistent with other online service portals

XOserve

respect 〉 commitment 〉 teamwork

- Therefore the project will deliver….

"The Data Enquiry Service"

- The new service will provide users online secure access to industry data and detailed information on their portfolio's
